

TWINNING / TRANSFER PROGRAMS

Twinning / Transfer programs allow Indian institutions to offer graduate and post-graduate programs which will have their regular curricula. The existing curricula may be supplemented by additional curricula of the American universities if desired by Indian institutions. Through twinning / transfer programs, Indian students will be able to earn several credits during the course of their normal study in Indian institutions. Students will have the opportunity either to complete their studies in India or to transfer their credits to the American universities at any time after completing at least one year of their studies in Indian institutions. Students, who opt for transfer, can then finish their degree programs by completing the remainder of credits in residence at the American universities.

Twinning / Transfer programs are "win-win" situations for all concerned parties. The American universities will receive well-prepared students who have been instructed entirely in English and are ready to begin their major sequences. Indian institutions are strengthened by access to the latest in American curricular developments. Foreign-bound Indian students save substantial cost of studying abroad. Further, students will have wide range of subjects to choose from in the American universities, apart from the opportunity to learn in two different cultural environments, and thus becoming well-rounded learners.

Under twinning / transfer programs, students who complete at least one year of graduate program (10+2+1) in Indian institutions will be eligible for admission as transfer students to graduate programs in the American universities. Students who complete second year (10+2+2) or third year (10+2+3) of graduate program may also transfer to graduate programs in the American universities and complete the remainder of the program. TOEFL and SAT will be required for admission to the American universities. Students who complete the first year of post-graduate program in Indian institutions will be eligible for admission to post-graduate degree programs of the American universities. TOEFL and GRE / GMAT will be required for admission to post-graduate programs in the American universities. The number of credits to be waived for students admitted on transfer basis will be at the discretion of the American universities. In case, any American university does not have its own credential evaluation mechanism, the credential evaluation report of World Educational Services (WES), New York, will form the basis for waiver of credits.

Students enrolling in the graduate and post-graduate programs in the American universities will be given degrees and diplomas by the American universities after successful completion of study. Transfer students will be charged the prevailing tuition by the American universities. Students who do not plan to go to the American universities and students who have been unable to get American visas will complete their program of study in India, would be awarded Indian degrees and diplomas by the Indian institutions concerned.

For twinning / transfer programs, the Indian institutions may invite visiting faculty of the American universities. In such cases, Indian institutions will bear expenditure towards travel, room and board of visiting American universities.

Given below are the details of American Universities which are interested in Twinning / Transfer programs in Collaboration with well-established Indian institutions. The text used is that of the concerned Universities.

Clarkson University

Exploring such possibilities is of interest but we have no specific target programs for this.

Concordia University

All areas of Engineering and Computer Science. Selected areas in Arts, Sciences, Fine Arts, Business.

D'Youville College

We have been successful in Canada, Georgia and Hungary using a 3+2 model. The basic model is: Student would complete their Bachelor's Degree in India, then attend D'Youville entering the 4th year of one of our BS/MS Programs. After 2 years of study at NYC, Students will have Bachelor's and Master's degree and would be eligible to apply for employment in the US for one year, The Majors of interest are International Business / Accounting / Information Technology. Other Transfer Programs are available in Liberal Arts, Biology, Mathematics, and Education.

Governors State University

BS chemistry, BS Computer Science, BS Biology
MS Computer Science, MS Analytical Chemistry, MS Environmental Biology

John Carroll University

- a) Exchange relations and
- b) Joint Degree programs at all levels + in all fields we offer.

Longwood University

We are willing to discuss Twinning / Transfer programs with a unity of undergraduate programs and our MBA.

Pacific Graduate School of Psychology

Certificate in Forensics and Correctional Psychology
Certificate in Neuropsychology

Roosevelt University

Bachelor's degrees: 2+2 or 3+1 articulation agreements for economics, computer science, math, hospitality and tourism management majors.

Saint Louis University

Business and Engineering

Southern Illinois University - Carbondale

The possibilities need to be explored - possibly Undergraduate and Graduate Business degrees, Baccalaureate completion program, Joint M.S. programs with IT.

Southern University and A&M College

Undergraduate: Civil, Electrical and Mechanical Engineering programs, Electronics Engineering Technology, program, and Computer Science program.

Graduate: Master of Engineering in CE, ME, EE. Master of Computer Science.

Temple University

We already have such collaboration with other universities in the Middle East in which people can take part of their degree programs in their home country and the remainder in the USA. We would like to explore such possibilities.

University of Alaska Fairbanks

University of Alaska Fairbanks is interested in developing twinning/transfer programs with accredited institutions in India in the areas of engineering (Petroleum, Mining, Geological, Mechanical, Civil, Electrical and Computer Engineering) and business administration

University of Oregon

The University of Oregon is interested in establishing relationships with similar institutions in India to explore the possibility of developing twinning and/or transfer programs.

University of Rochester

The University has a new partnership with the Shanghai University of Finance and Economics for a specific number of guaranteed undergraduate transfer students each year. We would be interested in establishing similar partnerships with Indian institutions.

University of Wisconsin - La Crosse

We would be interested in transfer programs within any of the programs that we do offer.

WVU Institute of Technology

WVU Tech is very interested in enhancing the internationalization of its campus and so would like to explore partnerships for Transfer Programs in the highly marketable fields of Accounting, Business Management, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Electronic Engineering Technology, Engineering Technology (Civil, Environmental, and Mechanical Emphases).
